

LETTER OF RECOMMENDATION

To Whom It May Concern,

I had the pleasure of supervising Youssef Ouarad during his time at Thales, where he first joined as an intern, then continued part-time during the school year, and later transitioned to full-time work over the summer. Over the course of a year-long project, Youssef played a central role in modernizing a legacy tool used at Thales.

Youssef demonstrated strong technical skills, helped define the technology stack and design scalable system architectures. His contributions were instrumental in improving features, portability and user experience.

During his internship, Youssef showcased adaptability and quick learning across a wide range of tasks. Whether scripting to automate a process, integrating components in a C-based test rig, or developing an *Electron*-based monitoring system, he consistently delivered high-quality results and quickly picked up new technologies as needed.

Youssef's combination of technical depth, problem-solving skills, and collaborative mindset made him an asset to our team. I am confident he will bring the same drive, expertise, and leadership to any future role.

Sincerely,

EBRAHIMINIA Saba
